

# Big Sky

## Premium Hardwood Collection

	Features	Benefits
<b>CONSTRUCTION</b>	3-Ply Engineered Solid	Full ¾" thick fillet engineered construction provides superior stability and less movement due to environmental conditions compared to ¾" solid flooring.
<b>WEAR LAYER</b>	6mm Sawn Face Precious Hardwood	Allows for maximum amount of sanding and life expectancy equal to traditional ¾" solid flooring while using less precious hardwood resources due to its engineered construction using renewable plantation hardwoods.
<b>CORE LAYER</b>	Hevea Core	Hevea is a hardwood species as dense as Oak that has enhanced dimensional stability that withstands pressures from external environmental changes and outperforms other engineered floors that use a plywood core.
<b>FINISH</b>	BONA UV Ultra Matte Urethane Factory Finish	Custom UV cured polyurethane finish is formulated using the latest technologies by the world's foremost finish manufacturer to emulate the look of European oil finishes without the additional maintenance requirements.
<b>FINISH TECHNIQUES</b>	Handcrafted Floor Artistry	Each piece is truly hand-worked floor art utilizing custom staining and hand-texturizing processes to avoid the typical overworked, machine like appearances of so many other wood floors in the market.
<b>LONG LENGTHS</b>	6' Average Length	On average 5 out of 7 boards will be 7' long, with an average length of over 6' creating expansive linear visuals.
<b>WIDE PLANKS</b>	7-1/2" Wide Planks	Wide planks display more natural character with fewer seams and enhanced grain visuals. They require a higher grade of lumber and produce less manufacturing waste. Visuals will include a mixture of live-sawn planks (rift, quartered and plain sawn all in the same board), exhibiting beauty seen only in the finest woodwork.
<b>VALUE</b>	High Investment Value	Unlike typical floor coverings like carpet, vinyl or laminate that periodically need to be replaced, Big Sky Premium Hardwood flooring is a permanent fixture that adds value to your home and can last a lifetime.
<b>WARRANTY</b>	50 Year Residential Wear 3 Year Light Commercial	Providing peace of mind and confidence knowing that your flooring investment will last for years to come.
<b>SPECIES</b>	Northwestern European White Oak	Known as the "King of the Forest", harvested from select forests in Germany and France. Superior to Southern Oak in stability, hardness, and color consistency with a tighter grain.
<b>ENVIRONMENT</b>	Plantation Grown	70% of the hardwoods used in the production of Big Sky Premium Hardwood are harvested from well managed plantations, resulting in better use of the slower growing hardwoods from natural forests.
