

Big Sky *by Viking*

EXCEPTIONAL SOLID SAWN TIMBER ENGINEERED FOR PERFORMANCE

From foundation to precious hardwood surface, each individual layer of Viking Big Sky engineered solid flooring is best-in-class. Together the result is unparalleled.

Tahoe

- Top Coat - UV ultra matte urethane factory finish
- Hardwood Surface - Precious hardwood with hand-crafted surface treatments and textures
- Core - At the heart of every floor is a specially formulated pattern of high density Hevea hardwood
- Foundation - Final timber layer gives additional stability and durability

SPECIES: Northwestern European White Oak, Northwestern European Ash, North American Hickory, North American Walnut

CONSTRUCTION: 3/4" 3-Ply Engineered Solid

WEAR LAYER: 6mm Sawn Face Precious Hardwood

CORE LAYER: Plantation Grown Hevea Hardwood

WIDTHS: 7-1/2", 9-1/2", 11-1/2"

LENGTHS: NW European White Oak - Up to 8' Long
NW European Ash & North American Hickory - Up to 7' Long
North American Walnut - Up to 6' Long
11-1/2" Wide Oaks - Up to 10' Long

FINISH: UV Ultra Matte Urethane Factory Finish

FINISH TECHNIQUES: Handcrafted Floor Artistry

INSTALLATION: Nail, Staple, Glue

GRADE: Above, On, Below

RADIANT HEAT: Yes

WARRANTY: 50 Year Residential Wear, 3 Year Light Commercial Wear, Lifetime Structural Integrity, Professional Sanding Guarantee

TRIM AVAILABLE: Quarter Round, Reducer, Stair Nose, T-Molding, Threshold, Custom Vents, Treads and Risers

Hand Crafted Floor Artistry

By bringing centuries old craftsmanship and cutting edge technologies together, Big Sky offers an unrivaled set of options that enhance the natural beauty of timber.

For centuries the old European craft of fuming wood to change the color has been used to suit individual tastes, a method whereby ammonia reacts with the natural tannin contained in the timber. Viking takes this know-how and uses the latest reactive stains which work on the same principal to create stunning, but completely natural looking flooring.

Unlike traditional stains, which basically place a closed pigment on top of the wood, reactive technology only works based on the amount of tannin contained at any specific point in the wood. So it's the tree, the life it's had, the soil it's grown in that's dictating the final color. So unlike traditional pigment stains our process has far more warmth and depth of color tones.

Throughout the Big Sky range the number of processes to create a given product vary, and much of this so called "modern" technology is applied by hand by modern day craftsman, thus giving every board that bespoke feel.

Embrace what nature has to offer and install a floor where the wear layer has taken decades or even centuries to grow, and see how Big Sky enhances that beauty and gives a unique feel and look that other flooring just cannot offer.

ASK ABOUT OUR SAMPLE CARTON PROGRAM

**Please remember that one of the beautiful properties of wood is that it is a product of nature and natural variations in color and grain pattern are to be expected. These samples are provided to assist you with general color selection and appearance but will not show all the characteristics of the final installed product. Multiple sample boards or a full carton of material will give you a more accurate representation.*

The most environmentally friendly flooring available are authentic wood floors. Trees are a renewable resource and provide flooring that is sustainable for many generations. All Viking Hardwood Flooring products are made with raw material originating from sustainably managed forests.
