## *Sustainable for Generations*

The most environmentally friendly flooring available are authentic wood floors. Trees are a renewable resource and provide flooring that is sustainable for many generations. Grown in the beautiful Appalachians, our North American Hickory hardwood is sourced from sustainably managed hardwood forests.

Taking inspiration from nature, this collection has colors often seen in rattan, wicker and other natural fibers giving your home a warm, earthy feel. Multi-layer stain application enhances natural wood tones. New Traditional hickory combines rustic wood character with a slightly weathered surface texture. This unique look features an urethane finish to resist scratching and stains, for a floor that you will love for years to come.

If you're looking for the highest quality and longest lasting value in solid hardwood flooring, you can be confident choosing New Traditional.

Appalachian Hickory Flooring with Timeless, Classic Beauty

\* Please remember that one of the beautiful properties of wood is that it is a product of nature and natural variations in color and grain pattern are to be expected. These color swatches are provided to assist you with general color selection and appearance but will not show all the characteristics of the final installed product. Multiple sample boards or a full carton of material will give you a more accurate representation.
